Subject: Pre-Regulatory Landfill Sites in Caswell County

Dear Mr. Howard:

The General Assembly of North Carolina enacted Senate Bill 1492 which created a program to assess the public health and environmental hazards at landfill and dump sites that operated prior to 1983 and to develop and implement remedial action plans at sites requiring remediation. The Pre-Regulatory Landfill Unit (Unit) was created in the Inactive Hazardous Sites Branch (IHSB) to oversee these activities. The purpose of this letter is to make you aware of the sites identified in your county and to provide general guidance of relevant state statutes.

Based on the information obtained by the Unit, the sites listed below tentatively qualify under Senate Bill 1492.

<u>ID Number</u>	<u>Site Name</u>	<u>Site Address</u>
NONCD0000216	Caswell Landfill	Slaughter Rd, Milton
NONCD0000215	Miles Garbage Dump	Harrelson Rd & US 62, Yanceyville

Work at these sites may be performed using the Unit's resources or through local government actions. The Unit has prioritized the sites statewide based on their threat to public health and the environment and will perform assessments and implement remedial actions based on this priority. Local governments may opt to perform the work at any time under the guidance of the Unit. Reimbursement of local government costs may be available for assessments and remedial actions to abate an imminent hazard as funds are available. The conditions for reimbursement include approval of the assessment and remediation plan by the Unit and certified accounting of costs. A document, *IHSB Guidelines for Addressing Old Landfills & Dumps*, was developed to assist local governments and the Unit in this work. It is available on our web site, http://wastenotnc.org/sfhome/IHSBRNCH_OldLandfills.HTM, for your review.

An additional purpose in notifying you of these sites is to provide information to assist in your responsibilities in the permitting of private drinking water wells. The General Assembly enacted legislation which required local health departments to implement programs for the permitting, inspecting, and testing of private drinking water wells by July 1, 2008. State well construction standards in 15A NCAC 2C require a minimum horizontal separation of 500 feet between a water supply well and a landfill

or disposal site. More precise location information for the sites in your county may be requested from the Unit.

If you are aware of additional sites, have additional information on the identified sites, or need further information, please contact me at (919) 508-8484.

Sincerely,

A handwritten signature in black ink, appearing to be 'AS' with a long horizontal flourish extending to the right.

Pre-Regulatory Landfill Unit
Inactive Hazardous Sites Branch
Superfund Section

cc: Mr. Ted Davis – Caswell County Environmental Health Director

MEMORANDUM:

July 16, 2008

To: File

From: Cheryl Marks

Re: Dowdy Dump
Dowdy Lane
Gatewood, Caswell County

Marshall Miller and Associates was contracted by the State's Inactive Hazardous Sites Branch to perform site location research and reporting activities at old landfills and dumps that ceased operating prior to 1983. This research and reporting included Dowdy dump.

The results of the investigation determined the site is included on the Inactive Hazardous Site List as Bryant Farm Drum Dump in Caswell County and never used by a local community. This site is not eligible for further investigation under Senate Bill 1492 and is removed from the Inactive Hazardous Sites Old Landfill Database. The report generated from this investigation will be added to the Bryant Farm Drum Dump site, identification number NONCD0001038.

February 26, 2007

<SAL> <FIRST> <LAST>, County Manager
County of <MUNICIPALITY>
<ADDRESS>
<TOWN>, North Carolina <ZIP>

Subject: Assessment, Cleanup, and Redevelopment of Old Landfill Sites Within Your Jurisdiction

Dear <SAL> <LAST>:

Governor Easley released his proposed budget February 22, 2007. Included in the budget is a specific item I believe should be of interest to you from a fiscal, environmental and public health protection perspective.

There are approximately 700 old landfills statewide and <LANDFILL#> old landfills in your local area that closed before the State permitting system became effective. These landfills are listed on the Old Landfill Sites portion of the Inactive Hazardous Sites Inventory maintained by the Superfund Section, Division of Waste Management. Any person, including local governments, that arranged for disposal or disposed of waste in the landfills may be held liable for the cleanup of the site. I have attached a report that identifies the location of known old landfill sites in <COUNTY NAME> County that may have closed prior to 1983 and thus qualify for the program described in this letter.

The Division has surveyed old landfills in 47 counties. The results of the survey indicate reason for concern about potential public health and safety impacts of these sites if they are not addressed. Seventy percent of the sites surveyed had a school, church, residence, day care or drinking water source within 1000 feet. The Division has found 102 old landfills that have a drinking water well within 500 feet. Thirteen of the landfills surveyed have residences built over the old landfill. The cost of assessment and cleanup of these old landfill sites can be as high as several million dollars.

Governor Easley's budget establishes a partnership between the State and local governments to both clean up the old landfill sites and provide funding for redevelopment of the sites. Many are in prime locations for redevelopment opportunities. The Governor's budget proposes to pay for cleanup and redevelopment of these sites through a surcharge on disposal of solid waste. The funding mechanism is a fair one. It is based on the idea that those who use solid waste disposal facilities should share responsibility for cleanup of sites used for solid waste disposal in the past that may have been lawful at the time, but did not meet standards that we now know are necessary to protect public health and safety.

The proposed \$2.00 per ton disposal surcharge would apply to residential, commercial, industrial, and construction and demolition debris type waste that is either disposed at a landfill or passes through a transfer station for disposal out-of-state. The State would use revenue from the surcharge to contract for cleanup of the old landfill sites and to provide grants to local government for redevelopment. The funds could also be used across the state to clean up other hazardous substance disposal sites that have no viable responsible party.

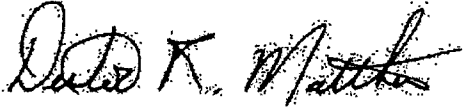

The only tool currently available to the State to ensure cleanup when it is needed is an enforcement action against those who owned, operated, or contributed to old landfills. The Governor's proposal would avoid placing an unreasonable

burden on any one local government and allow us to use our resources for actual cleanup rather than legal action. When old landfill sites were in use, North Carolina citizens, businesses, and industries benefited from their existence as a place to dispose of waste. The surcharge on waste disposal is a way for citizens, businesses, and industries to form a partnership for cleanup and redevelopment of these old landfill sites.

There is great interest this session of the General Assembly in strengthening requirements for landfills permitted in North Carolina. I encourage you to take a close look at legislation that will be introduced, specifically this initiative and what it can bring to your jurisdiction.

If you have questions regarding the program for clean-up of old landfills, please contact Jack Butler, Chief of the Superfund Section, at jack.butler@ncmail.net or call (919)508-8450.

Sincerely,

A handwritten signature in dark ink, appearing to read "Dexter R. Matthews". The signature is fluid and cursive, with the first name "Dexter" being more prominent.

Re: Request for Information on old unlined landfills, Caswell County.

Dear Mr. Earp,

The Division of Waste Management, Superfund Section, Inactive Hazardous Sites Branch (Branch) is in the process of cataloging old landfills in the state. This letter is being sent to you to solicit your cooperation in providing information on old unlined landfills that are not subject to Division of Waste Management, Solid Waste Section post-closure regulations in your county. This process is a part of a statewide effort to accurately inventory old dumpsites to aid in safe reuse and to protect public health and the environment.

Once an old landfill site has been identified, the site location, site usage, and vicinity usage is researched. Potential hazards to the public and the environment are then evaluated by risk assessment. Sites then are reviewed based on risk and/or by safe redevelopment requests.

The Branch then works with owners and responsible parties on final solutions for containment of the waste and to ensure safe reuse of the old landfill sites. Safe reuse might involve engineering controls to prevent exposure to wastes, if necessary, and restrictive covenants limiting the property to certain uses and setting conditions for construction or other soil disturbing activities. Annual reporting that restrictive covenants remain in place will be a duty of the current owner.

Known old landfills/dump sites are maintained in a database. Attached is a listing of known sites located in your county. Available information that may include location and years of operation information for each site is also listed. Please review the list and verify or provide information that will more accurately characterize the site(s). If you have knowledge of sites not included on the list, please add the additional sites along with location information, directions, years of operation, and any additional notable information.

Please return the list and any additional information within 90 days to:

Cheryl Marks
Inactive Hazardous Sites Branch
Superfund Section
NC Division of Waste Management
401 Oberlin Road - Suite 150
Raleigh, NC 27605-1350

Or you may email me with your response at Cheryl.Marks@ncmail.net or call with any questions concerning this request at (919) 733-2801, extension 283. Thank you for your cooperation.

Sincerely,

MEMORANDUM

DATE: October 14, 1997

TO: File

FROM: Keith Snavelly, Hydrogeologist *RKS*
Inactive Hazardous Sites Branch
Superfund Section

RE: Site Status Update
Bryant Farm Drum Dump
Gatewood, Caswell Co.

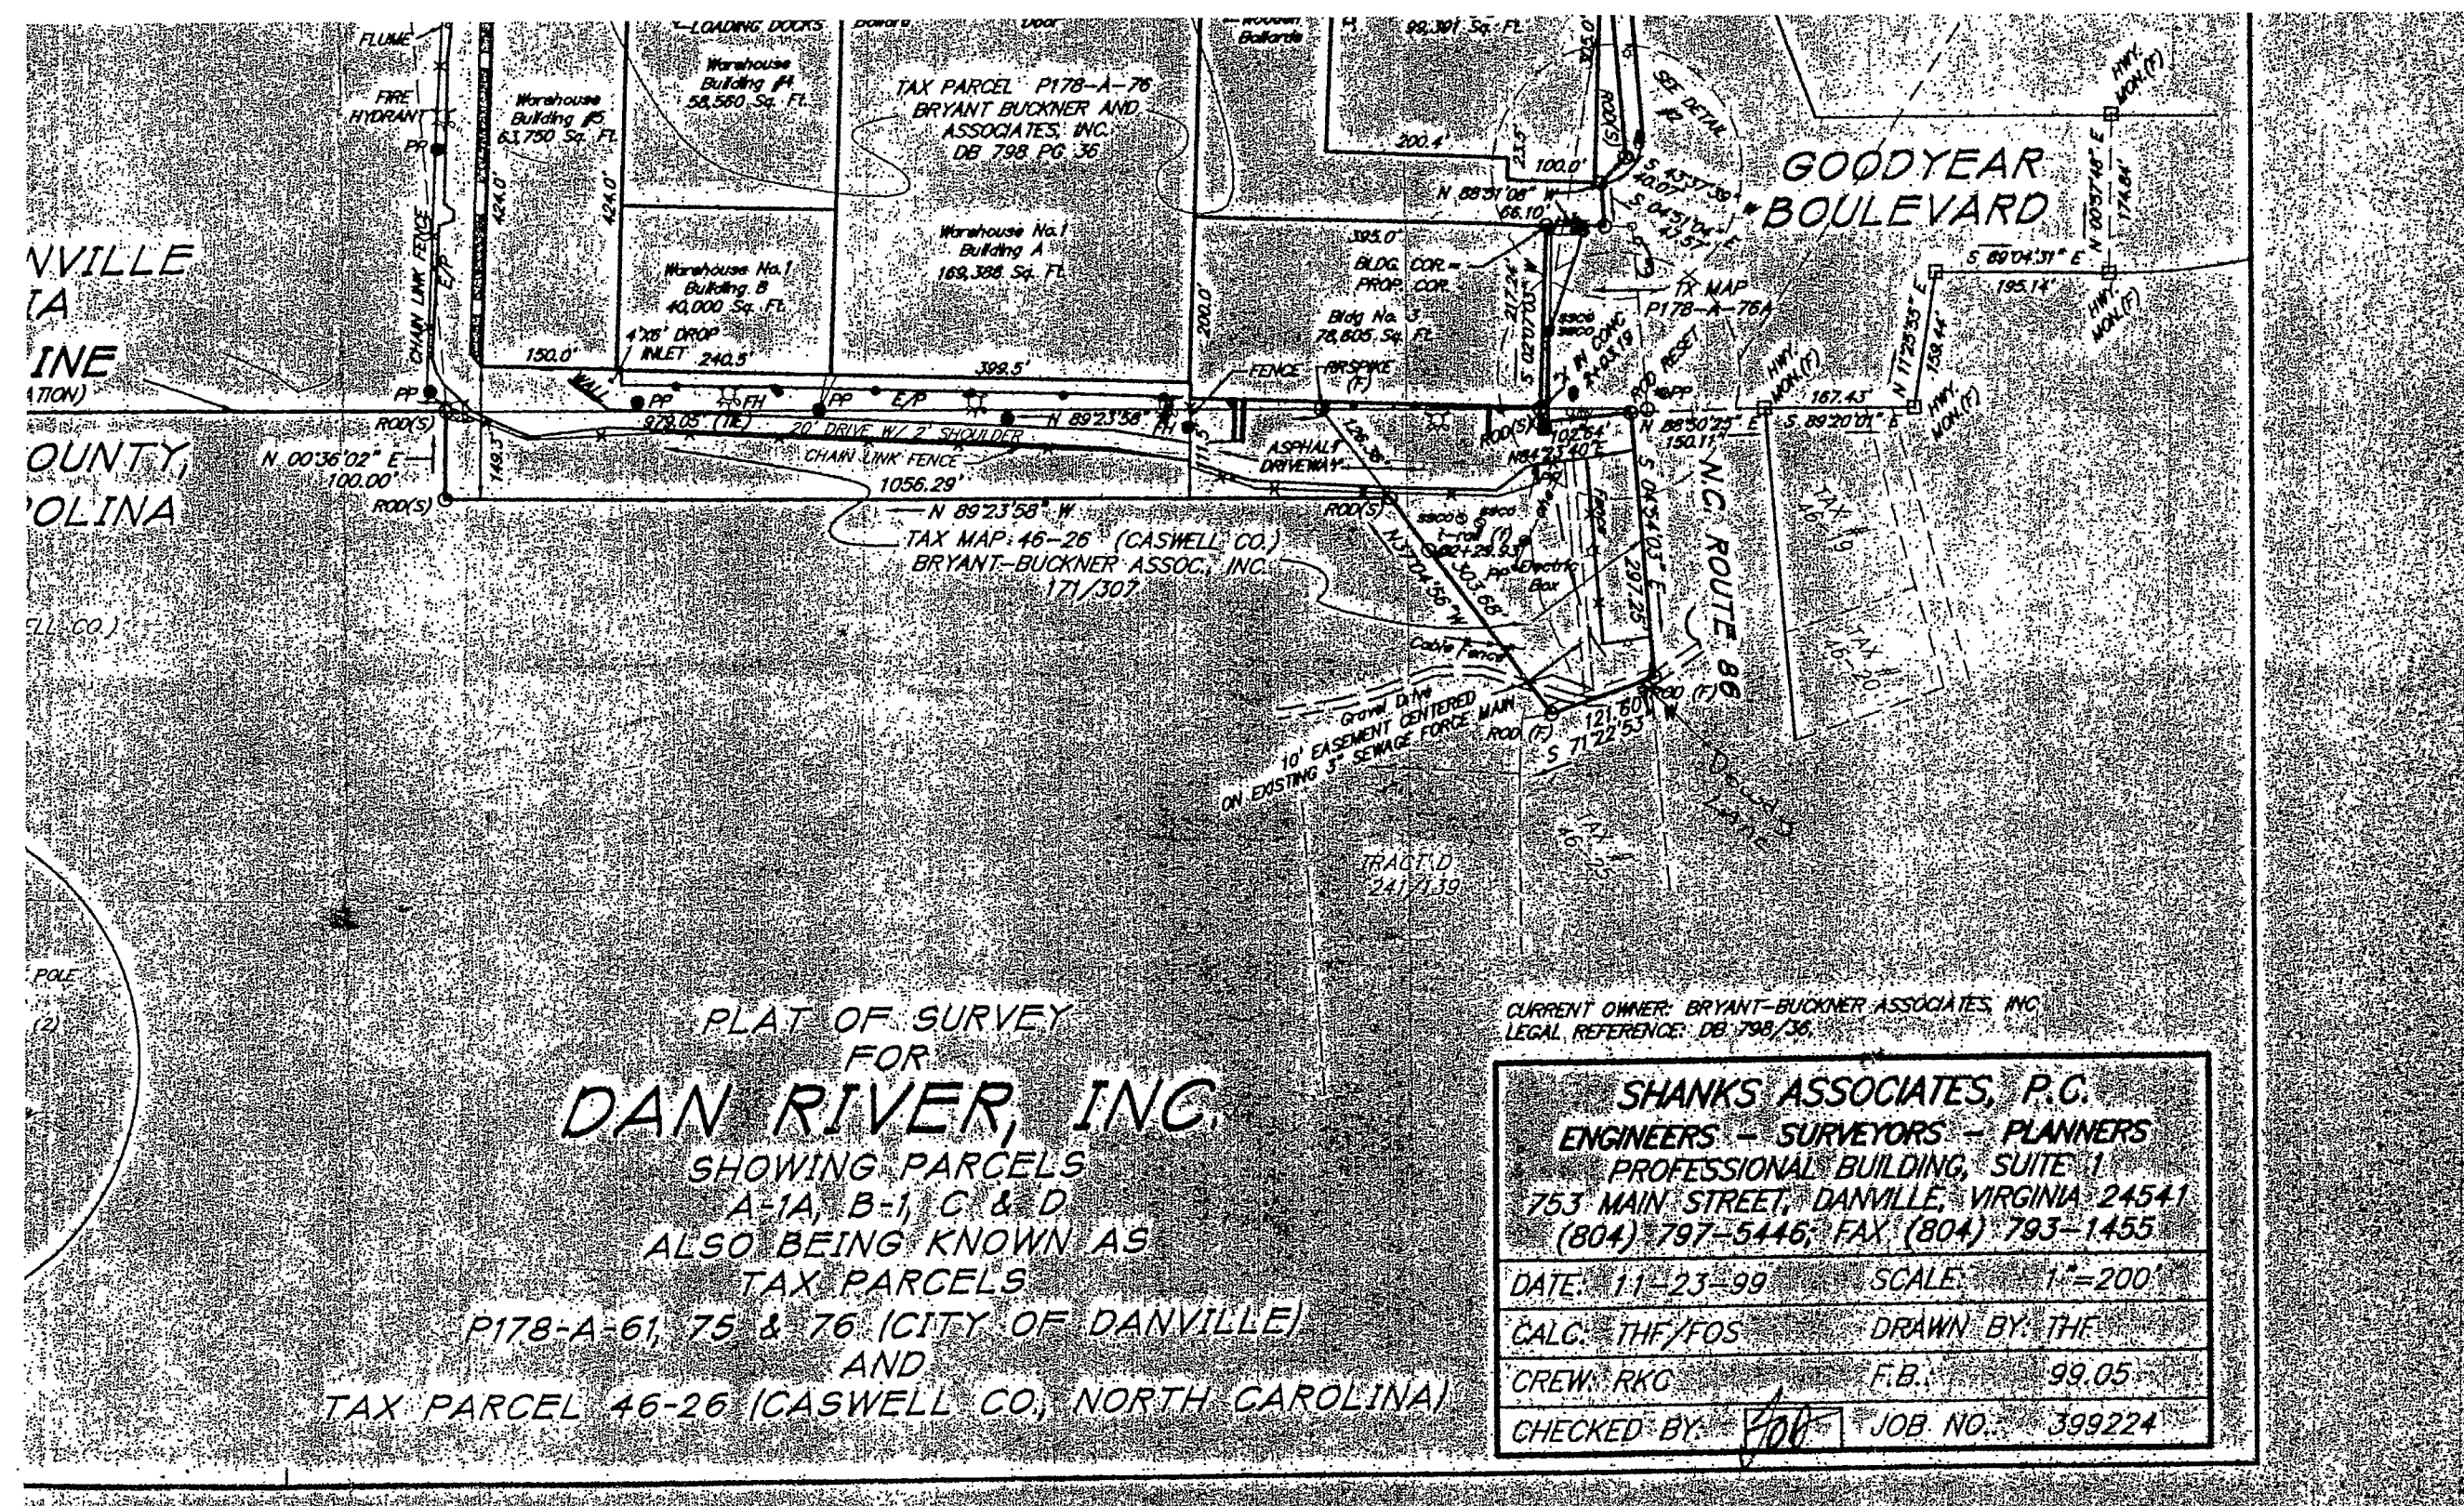

Review of the Superfund Site Screening file for the referenced site indicates that approximately 25 to 27 years ago, old tires, paper, wood pallets, carbon black, and 55-gallon drums were placed in two gullies of the site by First Piedmont Corporation, a landfill company in Danville, Virginia operated by Ben Davenport in 1986. The waste were derived from Goodyear Rubber Company in Danville.

A partial cleanup plan was developed by Mr. Bryant the property owner and First Piedmont Corporation. This action consisted of removing the drums containing rubber slurry wastes to another landfill in Danville and covering the deposit area with one to two feet of soil. Mr. Tommy Stump of First Piedmont Corporation reports that similar rubber slurry wastes from Goodyear are not considered hazardous wastes and are now being placed in the landfill operated by First Piedmont Corporation in Danville. In addition, Mr. Stump took a composite sample of the slurry from the drums on the Bryant farm and had it analyzed by IEA Labs in Research Triangle Park. The analyses showed the slurry to be non-hazardous by characteristic. However no organic analysis for hazardous substances were performed. Also, no data is available in the file describing the completeness of the removal (refer to file for laboratory report).

After the drums were removed from the site between 1986 and 1987, the landfill site was recorded in the Register of Deeds office of Caswell County on January 14, 1988 Deed book 245 and page 729. This closure notice is not a permit for solid waste disposal and is not to be construed as a permit for a disposal facility. The site was never been a permitted solid waste disposal site.

I recommend that this site be added to the Inactive Hazardous Sites inventory for further investigation.

Dear Mr. Willis:

On October 18, 1978, Mr. John Winkler, Sanitarian, Caswell County Health Department, and I made an investigation of the branch above your farm pond. Our investigation was in response to your letter of September 4, 1978, concerning garbage washing down the branch into your pond.

Mr. Winkler and I observed an open solid waste dump in a draw not far above your property. The property owner was contacted, and it was agreed that the waste would be removed from the draw. It was further agreed that the draw would not be used for solid waste disposal in the future.

Hopefully, this will result in no further waste washing into your pond. Should you have questions or need further assistance, please call Mr. Winkler or me.

Sincerely,

Julian M. Foscue, III
District Sanitarian

Office of the County Manager
Post Office Box 98
Yancyville, N. C. 27379

Dear Mr. Honeycutt:

In reply to your letter of August 30, 1977 with reference to Water Treatment Plant sludge the following statement is made.

The sludge from a water treatment plant is not considered to be a hazardous waste. If the sludge is placed on a drying bed or other methods are used to remove enough water so the sludge can be landfilled as a dry material, no free moisture that would flow from the material if it was placed on a impervious surface, then this office would have no objection to it being placed in a sanitary landfill.

Sincerely,

O. W. Strickland, Supervisor
Solid Waste Management Unit

Dear Mr. Strickland:

Caswell County has received a request from the Yanceyville Sanitary District to place sludge from the Yanceyville Water Treatment Plant into the Caswell County Sanitary Landfill. It has been told to us that we should not accept this sludge in other than a dry and solid state. It appears that the definition of dry and solid is somewhat nebulous at this point in time.

Would you please clarify for us how the County might be able to take this sludge from the Water Plant?

I look forward to your reply.

Dear Mr. Usry:

On a recent visit to Caswell County by your representative, Mr. Foscue, we learned that your Department had completed the survey and plans requested by the Caswell County Board of Commissioners for the location, pickup, and disposal of a green box system of solid waste collection in the county.

Mr. Foscue mentioned that you could probably have your representative meet with our Board to discuss the plan in detail. If so, we would like to have your representative meet with us on November 3, 1975, if it is convenient for you to do so. We are reserving the eleven (11:00) o'clock hour for this purpose unless we hear something different from you.

Thank you for your past service to Caswell County.

August 8, 1975

Mr. S. H. Usry, Head
Solid Waste & Vector Control Branch
Sanitary Engineering Section
Division of Health Services
P. O. Box 2091
Raleigh, North Carolina 27602

Dear Mr. Usry:

Several years ago your Department made recommendations to Caswell County concerning a solid waste collection service through the use of containers located throughout the County. As you know, our Board moved in the direction of granting a franchise to a private collector that uses both containers at industrial and commercial sites and door to door pick-up for home waste. Since that time quite a few people have expressed opinions to the Board that a container system would provide better service to the people here.

Following their meeting on Monday, the Board directed that I should request that you once more consider the possibility of implementing a container pick-up service and furnish them with a plan including the cost of such a plan that would give the necessary service to Caswell County people.

We expect that our problems with the new landfill project will be resolved real soon and we will be in operation before too long.

Thank you for your past service to Caswell County.

Sincerely,

A handwritten signature in dark ink, appearing to read "J. A. Brooks", is written over the typed name.

Yanceyville, North Carolina 27379

Dear Mrs. Bray:

In reply to your letter of July 24, 1972, Mr. Julian M. Foscue, III, District Sanitarian, will be glad to meet with Mr. Claytor concerning the county sanitary landfill site. Mr. Foscue will get in touch with Mr. Claytor concerning the date and time of this meeting.

If I can be of assistance with this matter, please let me know.

Very truly yours,

O. W. Strickland, Supervisor
Solid Waste Management Program
Solid Waste & Vector Control Section
Sanitary Engineering Division

Raleigh, North Carolina

Dear Mr. Strickland:

Mr. Claytor asked that I please write you again requesting that you please come to the Health Department to meet with him anytime after Monday, July 31, in regards to a sanitary land field the county is in process of obtaining.

We feel this is real important and would appreciate your coming as soon as possible. Also, please let us hear from you as to when you will be here so that we can make arrangements necessary.

Many thanks for your help!

Sincerely yours,

DISTRICT HEALTH DEPARTMENT

Linda B. Bray

Re: CH No. 71-0362
Collection and Disposal of Solid
Waste
Caswell County

Dear Mr. Hendricks:

Caswell County needs an adequate system for the collection and sanitary disposal of solid waste.

The County recently requested the State Board of Health to assist in the development of a plan for solid waste disposal, but the plan has not as yet been completed and no cost estimates have been prepared. Therefore, until the plan is developed, we have no basis for determining if the estimated total project cost is correct.

Very truly yours,

Marshall Staten, Director
Sanitary Engineering Division

SANITARY ENGINEERING
DIVISION

Dear Sir:

This is to request the assistance of your agency to develop a plan for the collection and disposal of solid waste in Caswell County. A preliminary application has been filed for assistance from the Farmers Home Administration for funds to develop the system.

There is considerable public interest and concern regarding the lack of adequate facilities and services for disposing of solid waste. Presently there is only one small waste collection service serving the Yanceyville Sanitary District. It is our desire to determine the feasibility of providing solid waste collection and disposal for the entire county.

We will appreciate hearing from you at an early date concerning this project.

Yours truly,

A. D. Swann, Chairman
Caswell County Board of
Commissioners

Dear Mr. Jarrett:

There is growing interest in Caswell County for development of a comprehensive anti-pollution committee. This committee is concerned with all the problems of environmental pollution, water, air, land, garbage disposal, etc. Several attempts have been made in years past to conduct an anti-litter campaign throughout this rural county, but we need a greater effort. One of the concerns is to organize a collection of papers, glass bottles and aluminum cans to be sold to buyers that will re-process these. I would appreciate any information that you have available that would help us in the organization of such a drive, rules and regulations, both State and Federal, regarding pollution and the names and addresses of possible buyers for the above mentioned products. Any suggestions that you have regarding any methods that have been tried in other areas would be greatly appreciated.

Very truly yours,

Albert E. Thompson Jr.
